

HM0037 BACK STAY CARR

Made to be used on 1 1/8" or 1 1/4" track, this sliding back stay carr is designed for use on the Herreshoff "S" Boat and similar boats with both upper and lower back stays. The carr is 3 3/8" long, 1 1/2" wide and 1 7/16" high.

HM9912 SLIDING BACK STAY CARR

This two piece locking set is designed so that the back stays can be returned to the same position each time. The set is 8 1/4" overall length, 1 5/8" wide, and fits 1 1/4" track such as BB0790.

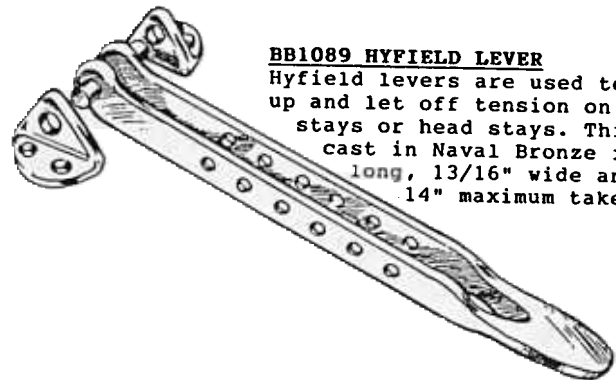

HM0030 HERRESHOFF BILGE PUMP

Standard equipment on all smaller Herreshoff boats this bronze pump moves an amazing amount of water in a very little time. On our test we achieved 2 1/2 gallons in 13 seconds. This pump is a must for all authentic restorations.

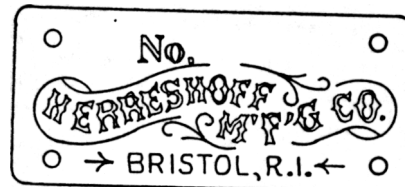

BB1089 HYFIELD LEVER

Hyfield levers are used to take up and let off tension on back stays or head stays. This lever cast in Naval Bronze is 12" long, 13/16" wide and has a 14" maximum takeup.

BB0394 PEARSON BUILDER'S PLATE

An exact reproduction of the original plastic builder's plate. This plate cast in Silicon Bronze will not deteriorate in sunlight like plastic and will last for many many years.

HERRESHOFF MFG. CO. BUILDER'S PLATES

Exact duplicates of the three versions of Herreshoff Builder's Plates (earliest version shown above). These plates are supplied without hull numbers. Intended for use on meticulous restorations of authentic Herreshoff yachts.

HM0062	Early - Before 1925
HM0060	Medium - 1925 - 1932
HM0066	Late - 1932 - 1939
